EDUCATION

SIES Graduate School Of Technology

Bachelor of Technology in Computer Engineering – CGPA: 9.58/10

Jul. 2024 – May 2028

Mumbai, India

Higher Secondary & Secondary Education

12th HSC: 91.5% 10th SSC: 90.0%

May 2024 | May 2022

Thane, India

EXPERIENCE

RVTechLearn

Web Developer Intern

Mumbai, India

July 2025 – July 2026

- Developed and enhanced two responsive web applications using modern web technologies, contributing to frontend implementation, UI development, and feature integration.
- Designed and implemented reusable webpage components, improving development consistency and reducing repetitive implementation effort across multiple sections.
- Optimized website styling, responsiveness, and cross-browser compatibility to ensure smooth user experience across different devices.
- Collaborated with team members to debug frontend issues, refine designs, and deliver functional web pages aligned with project requirements.

IETE Student Council, SIES GST

Web Development Volunteer

Navi Mumbai, India

Jun 2025 – Jun 2026

- Built and contributed to the official **IETE Student Council website**, implementing responsive interfaces and structured web components for council activities and events.
- Collaborated with the council team to improve digital outreach by developing an organized and accessible online platform.

PROJECTS

AccessHire – Accessible Hiring Platform | *React, Next.js, Firebase, Accessibility*

- Developed an **accessibility-first hiring platform** for Persons with Disabilities (PwD), enabling inclusive job discovery, applications, and employer-candidate interactions.
- Implemented dedicated dashboards for candidates and employers, supporting job posting, application tracking, and applicant management workflows.
- Integrated **Firebase Authentication and Database** for secure user management and scalable data storage across platform modules.
- Built assistive features including **High Contrast Mode, Voice Search, and Read Aloud** to improve accessibility and usability for diverse users.

VYUHA.AI – Vulnerability and Yield-driven Unified Hardening Assistant

Hack4Humanity 2026 — Cybersecurity Track — Finalist

- Built end-to-end cybersecurity platform (Fastify + TypeScript + Supabase) integrating **NVD/CISA/EPSS threat intelligence** to intelligently prioritize CVEs by real-world business impact
- Engineered **Hybrid Risk Intelligence Engine** combining CVSS + exploitability + attack path analysis using NetworkX; reduced analyst triage time by 25–30%
- Developed **RAG-based AI Security Copilot** using FAISS + Groq LLM delivering evidence-backed remediation recommendations in <2 seconds
- Designed **B2B SaaS business model** (\$2.4K–\$12K/year) targeting SOCs/MSPs; projected \$300K ARR Year 1 with 88% gross margin and 25x LTV:CAC ratio

LEADERSHIP & ACHIEVEMENTS

Top Finalist – Samved Hackathon | *IoT, ESP32, MQ Sensors, Node.js, React*

Solapur, India

- Built an IoT-based safety monitoring system using ESP32 and gas sensors (MQ-4, MQ-135) for real-time hazard detection in confined environments.
- Implemented edge-based decision logic to classify environmental conditions as SAFE/DANGER and trigger instant alerts through LEDs and buzzer.
- Integrated hardware components with a Node.js backend and React dashboard, enabling real-time data transmission and monitoring through REST APIs.

TECHNICAL SKILLS

Programming Languages: C++, Python, JavaScript (ES6+), HTML5, CSS3

Frontend : React.js, Next.js, Tailwind CSS, Responsive Web Design

Backend : Node.js, Express.js, REST APIs, Firebase Authentication

Databases: MongoDB, PostgreSQL, Supabase, Firebase Firestore

Developer Tools & Cloud: Git, GitHub, VS Code, AWS, Vercel, Netlify
